Mitsubishi Chemical Advanced Materials Receives Lam Research 2026 Supplier Excellence Award

USA, August 12, 2026 — Mitsubishi Chemical Advanced Materials today announced that it has been recognized as a recipient of the **2026 Supplier Excellence Award for Leadership in Quality** by Lam Research, a global supplier of innovative wafer fabrication equipment and services to the semiconductor industry.

The Lam Research Supplier Excellence Awards evaluate top-performing suppliers based on performance, commitment, and alignment with Lam's operational and strategic goals. Out of Lam Research's extensive global supplier base, Mitsubishi Chemical Advanced Materials was among 14 companies recognized across various leadership categories for outstanding contributions to the semiconductor supply chain.

"We congratulate Mitsubishi Chemical Advanced Materials, Inc. on winning Lam's Supplier Excellence Award for their leading performance in the Leadership in Quality category," said Karthik Rammohan, Senior Vice President and Head of Global Operations and Enterprise Services, Lam Research. "As AI accelerates innovation and increases demand throughout the semiconductor ecosystem, close collaboration with our suppliers is essential to maintaining the agility, resilience, and scale our customers depend on."

This recognition highlights Mitsubishi Chemical Advanced Material's dedication to providing high-performance materials and advanced engineering solutions that meet the rigorous standards of next-generation semiconductor manufacturing. Through close collaboration with Lam Research, the company continues to support critical advancements in wafer fabrication equipment and global chip production.

"We are honored to receive Lam Research's 2026 Supplier Excellence Award for Leadership in Quality. This recognition reflects the dedication of our teams, our unwavering commitment to operational excellence, and our focus on delivering the consistent quality and reliability that our customers expect. At Mitsubishi Chemical Advanced Materials, Inc., we believe that true innovation is built through strong relationships and strategic alignment. By working closely with customers such as Lam Research, we are proud to help advance semiconductor technologies that power

Mitsubishi Chemical Advanced Materials

innovation across industries and contribute to a more sustainable future." said Stephen Turton, Managing Director, Mitsubishi Chemical Advanced Materials Co., Ltd.

About Mitsubishi Chemical Advanced Materials

Mitsubishi Chemical Advanced Materials is a leading global manufacturer of high-performance thermoplastic materials. With locations in 20 countries and more than 2,800 employees, its specialty engineering thermoplastics and composites are superior in performance to metals and other materials and are used in a wide range of applications and industries, including semiconductor, digital, and many more.
